Delivered

## What are Toilet Cubicles and Partitions

Toilet cubicles and partitions are specialized structures designed to create private, enclosed spaces within public or commercial restrooms. They are essential for maintaining hygiene, ensuring privacy, and optimizing space in high-traffic areas. These partitions are typically constructed from durable materials like compact laminate, phenolic panels, or metal, offering resistance to moisture, wear, and frequent use. Toilet cubicles are a smarter alternative to traditional brick walls, offering numerous advantages. They are thinner and modular, maximizing restroom space while being more cost-effective to install, maintain, and replace. Unlike brick walls, cubicles allow for quick installation, reducing downtime, and come in a range of customizable colors, materials, and finishes to match any design aesthetic.

### Our range of Hardware

Toilet cubicle hardware includes essential components like hinges for smooth door movement, locks for privacy, brackets for securing panels, coat hooks, door stoppers, and support legs for stability. Typically made from durable stainless steel (SS 304 or SS 316), this hardware ensures long-lasting functionality, corrosion resistance, and a sleek, modern finish for restroom cubicles.

## Why Choose Us For Installations

EXPERTISE WITH YEARS OF EXPERIENCE WE DELIVER SEAMLESS INSTALLATIONS THAT GUARANTEE FUNCTIONALITY AND AESTHETIC APPEAL
